Thank you for your purchase of
Eplex7 Quantakor plugin instrument

INSTALATION INSTRUCTIONS:
1. Firstly download DEMO version for Windows or MAC from our website:
https://eplex7.com/quantakor-vsti-au-plug-in-instrument/
and follow these installation instructions:

2. Now download bank of instruments from the link in the email.

3A. If you are WINDOWS based,

You should download only one DEMO folder **32bit or 64bit** depending on your host application (Cubase, Ableton, FL Studio etc.). Do not install both versions, it can cause conflict and error!
1. Copy all files from folder (.dll and instruments folder)

and paste them to VST folder of your DAW, it is usually:

C:\Program Files\Steinberg\VstPlugins
C:\Program Files\imageline/flstudio/plug-ins/vst
or similar.

2. Then open the folder, that you have installed to your host application mentioned in previous step.
You will find other 3 .mse files here default.

3. Unzip the ZIP file that you have downloaded from the email, that we sent you after purchase. Unzip the folder. Paste your password to open it. You find .mse files.
Now copy only .mse files (not the folder) and paste them into opened folder mentioned in point 2.

Then re-scan plugins in your host and open as instrument.

You can increase the number of instruments with our small instrument banks, available here: https://eplex7.com/product-category/instrument-banks/

3B. **If you are** <mark>APPLE MAC</mark> **based**, install Audio unit or VST3 folder:
"Eplex7 Quantakor.component" or „Eplex7 Quantakor.vst3.vst"

INSTALLATION INSTRUCTIONS for VST3:

1. Copy "Eplex7 Quantakor.vst3.vst" package to your VST FOLDER of your DAW.

2. Then open "Eplex7 Quantakor.vst3.vst", that you have installed to your host application mentioned in previous step.
Left or Right click to file (folder) / Show package contents / Go to sub-folders: contents/resources/... (you will find other 3 .mse files here default)

3. Unzip the ZIP file that you have downloaded from the email, that we sent you after purchase. Unzip the folder. Paste your password to open it. You find .mse files. Now copy only .mse files (not the folder) and paste them into opened folder mentioned in point 2.

Then re-scan plugins in your host and open as instrument.

You can increase the number of instruments with our small instrument banks, available here: https://eplex7.com/product-category/instrument-banks/
